

SCENARIOS

All students whether top water, shallow restricted or Quick-Rescue Diver (QRD)TM participate in the below skills except for underwater search patterns requiring SCUBA.

Please note that part of our training package for all top water training includes mask, snorkel and rescue swimmer inflatable training vests. Scenarios offered in the non-scuba training include both Vehicle Settled, Cab Showing as well as Vehicle Settled Cab Observed, Shallow Depth. Training in both scenarios allows departments to evaluate their interest in pursuing further education or expanding current capabilities.

For departments that may want to explore expanding their capabilities, GSDR has a number of Quick-Rescue Diver equipment that can be displayed, rented and compared side by side. Our subject matter expert can answer your questions, offer experienced based opinions and recommendations.

We currently have relationships with companies such as Zeagle, Scuba Pro, Brownies, Halcyon and others to provide you with the best possible equipment for your mission. We can also offer equipment discounts for course-related purchases.

Rescue scenarios — Tendered and Free Swim Exercises

1. Scene size up, Communication, Coordinating Tiered Response and Resource Acquisition
2. Zero Visibility, Vehicle Orientation, Body Positioning and B-Post Safety
3. Driver Assessment, Squaring and Extrication
